

ABSTRACT

WATER SPORT IMPLEMENT LEVERAGE SYSTEM

A watercraft for towing a performer equipped with a water sport implement having a support surface on a deck thereof adapted to support a water sport implement and a performer of the water sport for the performer to put on the water sport implement.

A first abutment is secured to the watercraft and protrudes with respect to the support surface of the watercraft, such that a water sport implement laid on the support surface is abutted against the first abutment when a performer is putting on the water sport implement.
